## Summary

With more than **20** years of experience as software engineer. I started my career from the ground up and have closely followed the field's evolution, from when the web was dominated by Flash to the current revolution in artificial intelligence. I'm always eager to learn and adapt to new technologies, and I have a strong passion for creating innovative solutions that make a difference. My expertise spans across multiple technologies, allowing me to tackle complex challenges with ease. I thrive in collaborative environments and I enjoy sharing my knowledge with others. My goal is to continue growing as a developer and become a reference in the field of software engineering.

## Experiences

**Senior Sofware Engineer** at **Travelers Haven (by Blueground)** - Sep 2022 to Present

I am responsible to create new features and maintain the existing ones in the portal management of the company, that is responsible for the entire company management, also one of the developers responsible for the very important and successful integration with Salesforce using Apex Code and Platform Events. Later, when the company was acquired by Blueground, I was still responsible for Travelers Haven portal but also for the document generation system and the centralized notification micro service of Blueground.

| Tailwind |

**Senior Software Developer** at **Kahau** - May 2016 to Jun 2018

In a team of two developers, I had the challenge to catch a car review in a 35% progress and restart it from scratch porting from PHP to Ruby on Rails, had a deadline of 15 days and we made it with very few bugs, that could be fixed later with the tests. In same team of two, we were also responsible to create a musician network from scratch and an auction system where several webpages could be synced in one place, the last one we used Node.
